Using the Back Function

1. **Right mouse click** on a column heading or active field, and in the resulting window, click on the **Back** option.

2. Click on one of the following options:
   - **Back One Navigation Step** – to undo the last function performed or go back to the previous view of the report.
   - **Back to Start** – to return to the original view of the report when it was first executed.
